Meds Reminder App

Introduction

Our WiseKreator team has developed this app which is a Medicine Reminder App focused to make lives of people requiring medications easy

Functionalities

- **Login Page** - It checks for the Username and Password so that individual user can access their own profile
- **Register Page** – This page helps register new user just by entering the Name, Email and Password, the Name being the username which will be required for Login.
- **Language Selection** – Our app provides wide range of language support throughout the app (currently supported languages are English, Hindi and Marathi).
- This app has two main functions – one being the **Medicine Reminder** and another being the **Appointment Reminder**.

- **Medicine Dashboard** – This page shows us about the medicines regarding which we want reminders in a sequential manner as we keep on adding
  - We can directly add Medicine Reminder just by tapping on the '+' icon
  - We can change the language from the top and also Logout from the account to go back to the Login Page
  - We can swipe right from left side of the app or tap on the top left icon to access the side navigation panel through which we can access the 'Appointments' section and the 'About Us' section. From the top of the navigation panel we can also go into our Profile.
  - Upon adding the reminders, we can also modify them by simply clicking on the reminder name and we can also delete them by swiping right or left.
  - There is also an Undo option which pops up once we delete a reminder so that we can undo it.

- **Add Medicine Page** – This page lets us add Medicine Reminders by simply filling the required fields
  - Firstly, we need to fill in the Medicine Name in the 'Medicine Name' Text Field
  - We need to then select the type of medication from the drop-down list
  - We need to then select the Disease for which we are taking the medication from the drop-down list.
  - We need to then fill in the Doctors Name who consulted to take the medicine in the 'Consulted By' Text Field.
  - We need to then check the days on which we need take the medicine by clicking on the down arrow and then selecting the days.
  - The selected days will then appear below, we can remove them if not required by simply clicking on the cross button.
  - We need to then select the Time from the Time Field and we can select multiple number of times in a day

- **Appointment Dashboard** – This page shows us about the medicines regarding which we want reminders in a sequential manner as we keep on adding
